- Output 2D PDF along with 3D PDF to support your company as you transition from 2d to 3D

Publish Rich MBD Information for the Digital Thread

Companies pursuing Model Based Enterprise (MBE) initiatives need to communicate MBD information throughout the digital thread. 3D PDFs and STEP are important pieces to the solution.

Fishbowl's LinkAccess MBE is integral with Windchill and publishes the rich Creo MBD information as 3D PDFs and much more.

Business Need

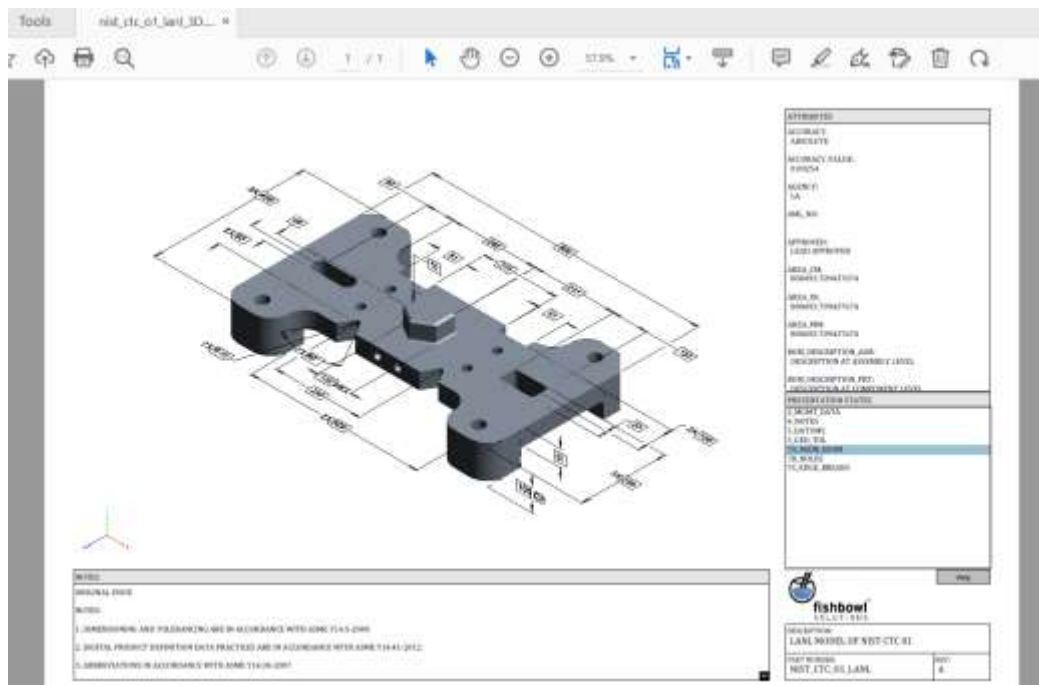

There are clear benefits that can be achieved with MBE. As companies implement MBE, they need to be able to communicate the rich MBD information and create the technical data packages for collaboration across the digital thread.

Challenges

There are a number of technical and cultural barriers that will be encountered during a MBE implementation. However, these barriers are fewer and lower than they were just a few years ago. Fishbowl's LinkAccess MBE is one of the reasons why this is so.

Solution

LinkAccess is an application framework developed to easily publish and distribute Windchill data for manufacturing, procurement, suppliers and more. LinkAccess MBE is the mode required for 3D PDF publishing and other technical data package features.
